

The Most Dependable Name on the Water.

For Over 50 Years.

TO OUR CUSTOMERS, TRADING PARTNERS AND FRIENDS,

For more than fifty years, Raritan has been meeting our customers needs for outstanding service and product reliability establishing ourselves as “the most dependable name on the water.” Our customers continue to be our focus, and the primary source of the ideas for our new products and product enhancements.

The median length of service for Raritan employees is about twenty years, an unusual number in the fast changing world we live and work in. It is a measure of the dedication of the men and women who design, manufacture, distribute and support Raritan’s products. Raritan, for example, was the first company to develop a flow through sewage treatment system suitable for small boats, well before there were any legal requirements. That product evolved into the ElectroScan which is the gold standard for small onboard treatment systems.

Our catalog represents a significant resource for both current and future users of our Marine Product line. Copies of the catalog are available on request from either our Millville, New Jersey or Fort Lauderdale, Florida Offices. It is also available in PDF format on the home page of our website <http://www.raritaneng.com>.

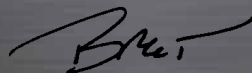

Over the more than fifty (50) years of Raritan’s history, we have always emphasized the maintainability and repairability of our products. Our catalog includes:

- Detailed product descriptions including benefits to our end users
- Exploded parts views help in identifying products, and their component parts
- Product dimension section
- Product selection guide aids in identifying the best products for various applications
- Product selection guide for repair kits helps identify the correct kit for a given product
- The most commonly sold product numbers are listed for each product
- There is a section explaining the structure of Raritan’s part numbers
- All sections are color coded and cross-referenced for ease of use

In the tradition of constantly improving our products and product offerings, we are pleased to introduce product enhancements and new products in this catalog:

- The Atlantes Freedom™ Vortex-Vac™ retains the substantial look and feel of our Atlantes toilets, while incorporating the flushing technology and performance of our newer heads at a lower cost
- Our exclusive distribution arrangement with TruDesign gives our customers access to the highest quality valves, thru-hull fittings and plumbing fittings; of particular interest are the electronic diverting valve (Electronic Aquavalve®) and a comprehensive ball valve range that includes electronic monitoring of the ball valve position
- Raritan’s new Saniflex Sanitation Hose is particularly remarkable for its odor free composition with the lowest permeation level of any rubber or PVC hose, and its extreme tight radius flexibility; we warrant it for five years for odor permeation

Best wishes for an enjoyable boating season,

Arthur J. “Bret” Bretnall, Jr.
President

All toilets are easy to clean and maintain. Certified Installers NOT REQUIRED.

They can be used with Electro Scan, Purasan or Lectra/San Type I MSD's or Managemm Type II.

Elegance Series - Quiet operation, low water consumption and small footprint is combined with an elegant looking bowl. Our Vortex-Vac flush technology eliminates remote mounted vacuum pump. Choice of three separate controls are available to meet customers preferences. Unique mounting system makes installation of this toilet simple and elegant.

Whisper Series - Whisper operation and quiet operation carry many different meanings. Raritan uses its years of experience to produce a series of toilets that not only function better but also sound better than any toilet on the market. We understand how important it is to be on board and flush without letting everybody else know you have just flushed the toilet. Each model can be ordered for remote pump intake of outside water or for connection to the onboard pressurized fresh water system with solenoid valve. Models include Atlantes Freedom with vortex vac, Marine Elegance and SeaEra.

Practical Series - For those preferring to use a hand operated toilet, Raritan offers several options. Raritan was the first to introduce a dual action pump in the marine industry. The PHII remains a standard for others to follow. Initially designed in bronze the pump later became the largest piece to be injection molded of Delrin® at the time. Models include our PHC and our PHII.

THINGS TO CONSIDER

Marine Sanitation Devices (MSDs) and Waste Treatment Systems - Any boat with an installed toilet must have either a Type I MSD which treats the waste and makes it safe for overboard discharge, a Type II MSD used for the same purpose as a Type I but treats to higher standard and is typically designed for vessels over 65' or a holding tank Type III MSD. All waste water inside the three mile limit requires treatment or holding of the waste. A complete list of Federal No Discharge Zones can be found on the EPA web site.

Power Consumption - When choosing a marine toilet, remember to look at overall power consumption. Many manufacturers make claims that their units draw very low amps. A low amp draw for a long period of time means overall consumption may be higher than a unit that draws more amps.

Water Use - Very low water use normally equates to poor performance when removing anything other than liquid from the bowl. The easier it is for people to use your marine toilet means the less trouble you will have with it.

	Amp Draw for 12 V in amp hr Pump/ Solenoid	Average water usage per flush	Maximum height of inlet pump (above waterline)	Dry bowl flushing option	Maximum discharge height	Marine size bowl available	Household size bowl available	Elongated bowl available

Atlantes FreedomTM with Vortex-Vac

Vortex-Vac technology creates vacuum internally so no remote vacuum pump required.

The Atlantes Freedom toilet features:

- Powerful vacuum without remote pumps
- Less water consumption with new fully programmable control
- Solid one piece porcelain bowl in traditional and elongated
- Easily installs above or below waterline on any vessel
- Sturdy stainless steel handle has "fail-safe" operation
- Designed for commercial and recreational vessel applications
- Sea/Fresh model available, allows user to easily choose onboard or outside water
- One model has a four function wall mounted switch including water saver, dry flush and normal flush
- Two models have momentary handle operation, no timer, offering flush and dry flush options
- Three models have flush handle with timed operation

Elegance Series

MARINE Elegance™

Marine Elegance bowls are available in four models: standard angled, standard straight, tall angled and tall straight. Each model is available in Bone or White.

The first toilet in its class to offer:

- Quiet operation
- Unmatched rinsing capabilities
- Low water consumption
- Built in shredder reduces clogs
- Can pump 10 ft vertically, or 100 ft horizontally

Our full size vitreous china bowl offers:

- One piece construction
- Full size toilet seat
- Compact installation
- Unique mounting system, simple installation, easy cleaning
- Reduced weight while adding additional support where needed

The Raritan Smart Toilet Control offers:

- Fully programmable, easy to use control
- Attractive wall mount design
- Flush using no water, little water, or timed flush
- Optional lock out feature when tank is full

Elegance Series

MARINE Elegance™

Now available with new Sea Fresh flushing option!

Easily switch between fresh or raw water allowing conservation of onboard water while providing the benefit of freshwater flushing before leaving the boat to reduce odors. (patented)

Smart Toilet Control

Offers 4 flushing methods:
Empty Only
Water Only
Normal Flush
Water Saver Flush

Fully programmable with a Holding Tank lock-out feature

Multi-Function Switch

Momentary operation of the toilet where user can choose water only, empty only or both at the same time depending on where the switch is pressed

Push Button Control

Momentary operation of both intake and discharge

EXPLODED VIEWS, PARTS AND OTHER OPTIONS ON PAGES 32-33

Whisper Series*

SeaEra™

- Powerful flushing action with advanced design features
- An excellent replacement for less durable, non-Raritan units
- Low water usage as little as 1 quart (1 litre)
- Bowl can be rotated 90 degrees for mounting in confined spaces
- Full size joker valve reduces clogs
- Stainless steel macerating blade
- Household or marine size bowls available
- Self-priming inlet pump can run dry
- Separation of intake and discharge means dirty water cannot enter bowl if seal fails
- Two year warranty
- Both 90 degree and straight discharge included

MODELS

Pressurized fresh water

- 12 volt **160MF012** with marine size bowl
24 volt **160HF024** with household size bowl

Remote intake pump raw water

- 12 volt **160MR012** with marine size bowl
24 volt **160HR024** with household size bowl

Integral intake pump

- 12 volt **160HI012** with household size bowl
24 volt **160MI024** with marine size bowl

SeaEra™ Conversion Kit

- An economical way to replace your electric or manual toilet
- Save the toilet bowl and seat - just replace the lower base
- Three basic models (all include heavy duty push button)
- Pressurized freshwater includes solenoid valve and vacuum breaker
- Seawater with integral pump - includes strainer
- Seawater with remote intake pump - includes strainer
- Intake pumps can be run dry without damage
- Two year warranty
- Both 90 degree and straight discharge included

Practical Series

PHII and PHEII

The most recognized and reliable manual toilets in the world. This manual design PHII is also available as our PHEII electric model.

- Electric model can be switched to manual operation within minutes
- Available for 12 or 24V DC operation
- Lever handle pumping – more efficient, simpler and cleaner than competing vertical piston pumps
- Powerful flushing action – 66% larger diameter housing and piston clears bowl in less strokes
- Pump construction – engineered polymer offers superior strength and durability over PVC
- Full size joker valve – reduces clogs and increases pump performance
- Conserves water – simple ¼ turn valve allows boaters to easily utilize dry pump option

Toilet Water Kit

The Toilet Water Kit introduces a small amount of R.C. into incoming flush water and deodorizes the water as it comes into the toilet bowl. Eliminates the odors associated with using raw water to flush.

- Toilet bowl deodorant
- Emulsifies materials that cause odors
- Lubricates the internal components of the toilet
- Fits toilets with 3/4" inlet lines

Raritan Check Valve

- Stops unwanted back flow of water
- Helps to maintain pump prime
- Installs in a 3/4" I.D. plumbing hose line
- Not for pressurized lines

PART #
RCV

DESCRIPTION

Raritan Check Valve

Vented Loop

Vented loops are commonly used for inlet and discharge pipes on toilet installations below the water line. Our aquavent is moulded in a glass reinforced nylon composite, with a silicon bleed valve. The bleed valve allows air into the system to stop siphoning yet seals effectively when water or fluid pass through.

The advantage with our vented loops over others is that the internal diameter is the same throughout the bend - meaning there is no restriction.

PART #
TD90321
TD90323
TD90319

DESCRIPTION

1" (25mm) in white
1 1/2" (38mm) in white
3/4" (19mm) in white

Vented Loop with Solenoid

When connected to an electric toilet intake, the Vented Loop with Solenoid seals upon energizing, allowing full fluid flow. When not energized, the siphon is broken as per the manual system (although quicker).

- Power Consumption
(upon energizing)– 400mA @12vDC

*Vented Loop with Solenoid is only available in 3/4".
Standard Vented Loops are also available in 3/4", 1", 1 1/2"*

PART #
TD90462

DESCRIPTION

3/4" (19mm) in white

Manual Aquavalue

The Tru-Design Aquavalue® is moulded from a glass reinforced nylon composite. High strength, high-modulus glass fibers impregnated into the nylon provides dramatic strength, stiffness, toughness, and dimensional stability.

- Clear indication of which port is in the closed position
- Versatile - many plumbing options
- Easy mounting - screws directly to bulkhead or floor
- User serviceable - full service and parts backup
- Lockable feature - no ability for accidental discharge
- Each valve supplied with spanner wrench

PART #

Raritan was the first company to develop a flow through system to treat sewage even prior to any legal requirements!

A flow through system is a tank directly connected to the toilet that treats waste each time the toilet is flushed. The advantage of Raritan flow through systems is that you are never holding raw sewage and only a limited amount of treated sewage is discharged each time. Large discharges of raw sewage, which includes full holding tanks containing chemicals used to control odor, can be dangerous to the environment. Raritan's first flow through system was simply a bottle of household bleach that was injected into the treatment tank each time the toilet was flushed killing all fecal coliform.

Raritan far exceeds the Federal standard for waste discharge to help preserve our waters. New advancements in flow through systems work differently but both Type I devices produced by Raritan far exceed the federal standard for discharge which is currently set at fecal coliform levels of less than 1000 per 100ml. Swimming beaches close when coliform levels exceed 200 per 100ml and shellfish beds close when coliform levels exceed 14 per 100 ml.

Both the Purasan and Electroscan discharge at levels lower than 10 per 100ml!

electro scan

- The most popular USCG certified Type I MSD
- Power requirements have been reduced by 36 % - each cycle uses only 1.2 amp hours of power
- Generates its own natural disinfectant from salt water
- Coated electrodes use salt water to kill bacteria and viruses without using harmful chemicals
- Records each treatment cycle and stores key information in non-volatile memory that can be summarized on the LCD display or downloaded to a PC
- Single button operation is possible
- Can be used with both manual and electric toilets
- Requires sea water salinity or salt feed tank
- Available in 12, 24 or 32V DC
- Sensor for manual toilet available for auto start part# 31-605

Purasan™

Originally designed for freshwater applications, the Purasan can be used in both fresh and salt water. Our USCG Type I certified marine sanitation device protects our waterways by neutralizing harmful waste.

- Treats each flush as waste is generated
- Lower power consumption than Electroscan
- Single button operation is available
- Easy to change tablet cartridge, neutralizes bacteria
- A single tablet cartridge lasts for up to 500 treatment cycles
- Can be used with both manual and electric toilets
- Can be used with 2 marine toilets in most applications
- Available in 12V, 24V and 32V DC

ManaGerm™

Complete onboard biological waste treatment system for up to 12 persons per day. Treats sewage biologically using air, water, and natural occurring bacteria.

- USCG Certified Type II Marine Sanitation Device
- Tank made of lightweight corrosion resistant polyethylene
- Easy installation - simple maintenance
- No moving parts in contact with sewage
- Quiet, durable 120V AC aeration pump included
- Uses very little electricity
- Operates with fresh, brackish and salt water
- For use on inspected and uninspected vessels
- Includes Bio-Starter, 10 lbs of tablets and five fittings
- Available with pump up kit for below water line installation
- Available for installation outside USA with non-hazardous (for shipping) P70 tablets, also 220v units

TM-4000 Four Channel Tank Monitor/Controller

Our four channel tank monitor provides an intelligent networked solution for the monitoring of up to four tanks. The system consists of the TM-4000 display controller and up to four HT-100 tank controllers and any number of RM-400 repeater displays. The system communicates via a 2-wire network cable with a maximum cable length of 1000 meters. Note: Two different display options are available.

FEATURES INCLUDE:

- Full control from one central location on your boat
- Displays bar graph or Lts/Gals and percentage
- Visual indication of tank level, seacock position & pump status
- Turn holding tank macerator pump on manually & off manually or automatically
- Turn water maker on/off manually or automatically
- All tank names are user programmable e.g. (Grey Tank) (Black Tank) (Fresh Tank) (Fuel Tank) (Day Fuel Tank)
- Backlight

HT-100 Tank Controller

FEATURES INCLUDE:

- Manages the tank high output and provides an input for the fluid level sensor
- Teach-in for level sensor with four point interpolation for irregular shaped tanks
- Tank high level output which can be connected to the toilet controller which disables the toilet when the holding tank is full

Tank Monitor

The finest holding tank monitor. Available with easy-to-read tank level indicators. Monitors up to four tanks from one convenient location.

EASE OF INSTALLATION:

- All parts are mounted outside of the tanks – eliminates need for special tank fittings
- No internal probes or floats
- Flush-mounted indicator panel has a smooth surface (no protruding switches or gauge)

EASE OF USE:

- Reliable electronic design perfected for the marine environment
- Can be used with any polyethylene or fiberglass tank for fresh or waste water
- Easy to use
- No maintenance required
- Gold-plated connectors ensure consistent and trouble-free performance
- Low power consumption
- Available for 12, 24 or 32V DC installations

Width: 4 1/2" (11.4cm)

Height: 2 1/4" (5.7cm)

1700 Series Water Heater

World-renowned water heater specially designed for the marine environment.

Provides the comfort and convenience of reliable hot water.

- Solid foam insulation means the water stays hot longer than with traditional fiberglass insulation
- Proven long-life design
- Withstands the rigors of the marine environment
- Glass-lined tank is more durable than stainless steel
- Attractive polymer jacket resists corrosion from dampness
- Ignition-protected, adjustable thermostat
- Environmentally friendly CFC-free foam insulation
- Replaceable magnesium anode to protect tank and neutralize acids in the water
- The tank is covered by a five-year Limited Warranty, the entire heater is covered by a two-year Limited Warranty
- Each unit is assembled by hand, individually tested
- Available in 6, 12 and 20 gallon models – with or without engine heat exchangers
- Available for 120V AC or 240V AC

Solid Foam insulation keeps water hotter longer and Steel Glass lined tanks have a longer life span than most traditional tanks.

Hot Water Heater Ordering Instructions

To find the correct part number for your application, please read the following instructions:

COLUMN 1

enter(17) = water heater

COLUMN 2

enter (06) = 6 gallon

enter (12) = 12 gallon

enter (20) = 20 gallon

COLUMN 3

enter (0) = without a heat exchanger

Without a heat exchanger you will rely solely on the electricity for heat.

enter (1) = with heat exchanger

This option allows you to use the hot water generated from the engines to heat the water.

COLUMN 4

enter (1) = 120 volt AC

enter (2) = 220 volt AC

COLUMN 5

enter (01) = GAZ heat exchanger fittings

enter (02) = METRIC heat exchanger fittings

enter (03) = 4500 watt heating element for use with 240 VAC only

We want to make sure you get the most convenience for your money. Please feel free to contact us with questions, or to review additional features available for your custom application.

17 Water Heater	06 six gallon	0 without heat exchanger	1 120V AC	01 GAZ heat exchanger fittings
	12 twelve gallon	1 with heat exchanger	2 220V AC	02 METRIC heat exchanger fittings
	20 twenty gallon			03 4500 W heating element 240VAC only

Raritan Organics

All natural products to help preserve and protect the marine environment

K.O. KILLS ODORS!

K.O. is a holding tank treatment specially formulated for today's marine market. Unlike chemical products, K.O.'s bioactive formula breaks down and neutralizes odor-causing waste materials instantly. Eliminates holding tank odors at their source. K.O. works when nothing else will!

- Odor-killing bacteria digests liquids, solid waste and paper
- Does not require adding "tissue digesters" or other "boosters" to be effective
- A small amount of K.O. can easily keep a boat odor-free between pump outs
- A safe, non-chemical and non-polluting product

PART #
1PK022
1PK0GAL

DESCRIPTION

K.O. Kills Odors! Bioactive treatment 22 oz. (.65 liters)
K.O. Kills Odors! Bioactive treatment 1 gal. (3.79 liters)

C.P. CLEANS POTTIES!

C.P. eliminates the worst raw odors from the intake line without brushing. The only toilet bowl cleaner Raritan recommends for Raritan toilets. C.P. is the only bowl cleaner that can be combined with K.O.

- The first bowl cleaner to combine a specialized strain of bacteria with 100% biodegradable cleaning agents
- Specially designed to make the bowl shine like never before and keep the entire system odor-free
- Leaves toilet bowls, drains and sumps sparkling clean
- A safe, non-chemical, non-polluting product destroys odors on contact
- Can also be used to clean sinks, showers and basins

PART #
1PCP22

DESCRIPTION

C.P. Cleans Potties! Bioenzymatic 22oz. (.65 liters)

Raritan Non-Organics

R.C. RARITAN CONCENTRATE!

R.C. is a toilet deodorant and lubricant for the internal components of the toilet. R.C. is a non-organic product.

- Toilet bowl deodorant
- Emulsifies materials that cause odors
- Lubricates the internal components of the toilet
- Recommended for Atlantes ADS and Crown Head deodorant bottle
- Not for use in combination with K.O.

PART #
CON22

DESCRIPTION

Raritan Concentrate 22 oz. (.65 liters)

C.H. CLEANS HOSES!

C.H. is specifically designed to remove uric scale from black water system from the toilet to the tank without having to remove hoses!

- Eliminates clogs which can cause poor flushing performance
- Non-toxic, biodegradable and safe to use with all materials commonly found in black water systems
- Safe and effective replacement to the muriatic acid treatments recommended in Lectra/San and Electroscan waste treatment systems

PART #
1PCHGAL

DESCRIPTION

Cleans hoses and MSDs

Icerette
AUTOMATIC ICE CUBE MAKER

*A dependable,
environmentally friendly,
fully automatic ice
making machine
designed specifically
for marine applications.*

- Wrap around evaporator coil ensures an evenly cooled interior
- Produces up to 22 pounds of crescent-shaped ice a day
- Removable ice bucket stores 11 pounds of ice
- Ice production stops automatically when ice bucket is full
- No drain required
- Magnetically sealed door has sturdy stainless steel hinges and locking latch
- Unique door lock holds the door closed in rough seas or opens when unit is shut down to allow proper ventilation
- Non-corrosive materials, fittings and fasteners
- Door can be hinged for right-hand or left-hand opening
- Each unit is assembled by hand, individually tested and backed by Raritan's one-year Limited Warranty and legendary technical support team
- Two sizes and several door color combinations that complement any boat interior
- Available for 120V AC, 60 HZ and 240V AC, 50 HZ

Marine Elegance Ordering Instructions

To find out the correct part number for your application, please read following instructions:

COLUMN 1

Insert (2) = Marine Elegance models

COLUMN 2

Insert (2) = standard height bowl
Insert (3) = tall height bowl

COLUMN 3

Insert (0) = angled back
Insert (1) = straight back

COLUMN 4

Insert (A) = bone, white is standard

COLUMN 5

Insert (H) = standard household

COLUMN 6

Insert (F) = fresh water solenoid
This allow user to flush using pressurized fresh water on board.
Insert (R) = remote sea water pump
This allows user to use raw water by installing pump remotely.
Insert (S) = sea/fresh option
This allows user to switch between fresh pressurized water and sea/raw water.

COLUMN 7

Insert (012) = 12V DC
Insert (024) = 24V DC
Insert (012T) = 120v/240V AC

COLUMN 8

Insert (blank) = fully programmable smart switch control
Insert (01) = momentary multifunction control
Insert (02) = heavy duty push button

Atlantes Freedom with Vortex-vac Ordering Instructions

To find the correct part number for your application, please read the following instructions:

COLUMN 1

enter (AV) = for Atlantes Freedom with Vortex-Vac models

COLUMN 2

enter (H) = household bowl
enter (L) = elongated bowl
enter (B) = household bidet
enter (C) = elongated bidet

COLUMN 3

enter (W) = white
enter (A) = bone

COLUMN 4

enter (F) = Pressurized fresh water

This allows users to use the pressurized fresh water onboard to keep orders down associated with raw water intake. Features our Whisper Flush, designed for quiet operation.

enter (M) = sea water solenoid

enter (R) = remote sea water pump

This option allows users to install pump away from the head to reduce noise levels, allows for easier access to the pump and is ideal where longer runs are required.

enter (S) = sea/fresh option

This allows user to switch between fresh pressurized water and sea/raw water.

COLUMN 5

enter (012) = 12 volts

enter (024) = 24 volts

enter (012T) = 120/240 volt hook up options

COLUMN 6

enter (01) = Smart Toilet Control

enter (02) = Handle Momentary

This option allows users to flush toilet with incoming water and discharge or discharge only depending on your requirements.

enter (03) = Handle Timed

This option includes a toilet control unit which allows for a timed flush operation while still controlling the intake and discharge separately, momentary flush lever will work if electronic timer fails.

enter (04) = Multifunction Momentary

We want to make sure you get the most convenience for your money.

Please feel free to contact us with questions, or to review additional features available for your custom application.

51	G13W	Pump Impeller w/(2) G15
52	G2M	Impeller Wear Plate
53	M23A	Lockwasher (4)
54	M30	Hex Nut, Brass (2)
55	M31	Flat Washer, Brass (2)
56	RNI	Nylon Bowl Mounting Washer (4)
57	VCAP	Vinyl Cap (bowl nut cover)

MISCELLANEOUS RELATED PARTS

PART #	DESCRIPTION
1234	Bowl Gasket (fits all Raritan toilets)
1236AW	Bowl Spud Assembly
1237W	Marine-size Bowl, Round Top Rim (White only), Incl. 1236AW
1238A	Seat and Cover for Marine-size Bowl (White only)
1244W	Household-style Bowl, Oval Top Rim available in White or Bone, includes
1236AW 1245	Seat and Cover for Household-Style Bowl
163000	In-Line Strainer
1PCP22	C.P., Cleans Potties, Bio-enzymatic, 22 oz.
CDS*	Continuous Duty Solenoid Relay
CHTT9	Hose Clamp for 1 1/2" I.D. Hose
CON22	Raritan Concentrate 22 oz.
CSRK	Repair Kit (Centrifugal Discharge Series) Includes: CH25, CH92, 1234, CH12, G13, CH8, CH37E, RNI, CH120, C253, CH59, 31-102, CH7, G15, 1203B1 and CH57
CDPUMPRK	Crown Head CD Series & CH11 Intake Pump Repair Kit (built before 4/95 Includes: 1203B1, CH12, G13, G2M, 31-102, CH7 and G15)
CDDISRK	Crown Head CD Series Discharge Repair Kit; Includes: 1234, CH120, CH57, CH92, C253, CH25 and CH59
CR1	Discharge Impeller and Macerator Assy. (incl. CH120, CH121, F149VT[2], and CH119MW)
PBS	Pushbutton Switch
RHT4	Inline Check Valve for 1 1/2" I.D. Hose
RTC*	Raritan Solid State Timer
RTCH24DA	Rectified Transformer (for 120 or 240 VAC input)
SFH	Saniflex Hose, 1 1/2" I.D. (sold by the foot)
SL	Super-Lube 1/2 oz. Tube
TD90319	Vented Loop 3/4"
TD90323	Vented Loop 1 1/2"
TD90314W	Y-Valve for 1 1/2" I.D. Hose

SeaEra Ordering Instructions

To find the correct part number for your application, please read the following instructions:

COLUMN 1

enter (160) = Sea Era models

COLUMN 2

enter (H) = white household size bowl

enter (M) = white marine size bowl

enter (L) = conversion kit

This allows users to replace base of electric or manual toilet for added convenience.

COLUMN 3

enter (I) = our integral pump

enter (R) = Remote Sea Water pump

This options allows users to install pump away from the Head to reduce noise levels, allows for easier access to the pump and is ideal where longer runs are required.

enter (F) = fresh water solenoid

This allows users to use the pressurized fresh water onboard to keep orders down associated with raw water intake. Features our Whisper Flush, designed for quiet

operation.

COLUMN 4

enter (0) = straight discharge and 90 degree

COLUMN 5

enter (12) = 12 volts

enter (24) = 24 volts

enter (32) = 32 volts

enter (12T) = 120/240 volt hook up options

COLUMN 6

enter (03) = momentary fill/dry flush switch

Note: Only available with remote pump (R) and freshwater solenoid (F) models.

Allows users to fill, or empty bowl, and or momentary flush options depending on your requirements to minimize water usage.

We want to make sure you get the most convenience for your money. Please feel free to contact us with questions, or to review additional features available for your custom application.

SeaEra Toilet Requirements

- Wiring:** 10 ga., will increase depending on distance from source
- Circuit:** 12V – Freshwater Model 25 amp
Intake Pump Model 25 amp
- Power:** Freshwater Model 13 amps
Intake Pump Model 23 amps
- Water Supply:** $\frac{3}{4}$ " line 3 gallons per minute, minimum pressure 5psi
- Discharge:** 1.5" ID hose required for 90 degree discharge and straight accepts either 1" or 1 $\frac{1}{2}$ "
- Optional:** Wall switch control, holding tank full indicator on switch

CONSUMER FEEDBACK SOLIDIFIES MARINE TOILET AS A TOP CHOICE

An award-winning marine toilet, the Marine Elegance® from Raritan is offered in an array of sizes and shapes, flush water alternatives and control options, ranging from a simple pushbutton switch to a sophisticated programmable electronic SmartSwitch. It can include a patented, switchable SeaFresh™ water configuration, a tall or short bowl and even a slanted or straight back. Although the Marine Elegance pushbutton model was selected as a Best Choice by Practical Sailor in recent tests, Raritan's most important recommendations come directly from its customers no matter which model or options they choose.

Cameron Hancock of Ontario, Canada says, *"A nicer toilet, the Elegance is a full one-piece unit that looks and feels like home. It's less expensive and draws lower power, we used an ammeter to test it."*

Offering a sleek, vitreous china bowl and full-size toilet seat, the Marine Elegance delivers a streamlined presentation and is easy to clean. Featuring Vortex-Vac® Flush technology, it provides quiet, efficient flushing action and performs at a noise level of less than 63 decibels, about the same as conversational speech.

Making installations in tight spaces possible, the incredibly compact head has a simplified mounting system.

Bob Benton of Palm Coast, Florida purchased a Marine Elegance head and installed it on his 1987 Carver Voyager. *"Installation was so easy even I could do it,"* said Benton. *"The instructions were clear and concise and everything worked and fit exactly as it should. The enclosed templates and mounting brackets made drilling holes and mounting the head very easy."*

"My boat is fairly small and therefore my fresh water tank is quite small, making water conservation very important to me," continued Benton. *"The Elegance uses so little water to flush, it's almost negligible, thanks to the programmed Smart Switch control."*

The powerful head can pump an amazing 10' vertically and 100' horizontally. A built-in shredder with stainless steel blades breaks waste up into small particles to reduce clogs.

"We converted from the Vacuum-based system to the freshwater 4-button controlled model," said Bill Lentz, who owns Wireless One, a 1993 40' Mainship sedan bridge. *"It has been over two seasons and we've never had the head clog or backup. We actually believe the unit could chew up and spit out a golf ball in pieces."*

Raritan's Marine Elegance SeaFresh configuration enables users to flush with seawater to conserve onboard water, rinse the bowl with fresh before leaving the boat for a few days or when traveling in areas where outside water may be contaminated.

INNOVATIVE Y-VALVE CONTROLS DISCHARGE BETTER

Protecting the environment includes following mandated waste discharge regulations. To better divert effluent to a holding tank for later discharge, the most dependable name on the water, Raritan, now offers the Tru-Design™ Electronic Aquavalue™. The most versatile diverter valve on the market, Aquavalue can be integrated into a vessel's electronic system to give owners full, electronic control from one location.

An excellent choice for modern boats, it's ideal for use in applications where remote push-button diversion and control of discharge flow is needed. Owners can now operate the diverting valve from a control panel with the push of a button. The control panel also has a Holding Tank Lock feature, which when paired with responsible holding tank use helps prevent accidental discharge.

LEDs on the control panel clearly denote whether the valve is in the Holding Tank or Overboard position and show which valve port is closed. If the valve is jammed, two LEDs flash. Owners can easily disassemble the unit, even while out on the water, to remove clogs or other foreign objects.

The lightweight Tru-Design Aquavalue is molded from a glass-reinforced nylon composite, resulting in dramatic strength, stiffness, toughness and dimensional stability. Its stainless steel fasteners will not deteriorate in salt-laden air. Both the Aquavalue and control panel are IP55-rated, so they're dust and spray proof.

The Aquavalue is pressure-tested to ensure quality and safety in terms of sealing and operation and its silicon seal offers good wear resistance. To keep the seal moving and lubricated, AquaValve features auto-rotate which enables the valve to automatically rotate to the unused port and back upon receiving vessel power. With a composite spanner included, owners can avoid using pipe wrenches that gouge the fitting, facilitating access in tight places.

To suit existing installations, Aquavalue is offered in 12 or 24V models. With a range of straight, 90° and 120° connections and two seal options, plumbing in confined spaces is made easy. It can be wired into almost any control system for seamless integration as an OEM product.

The Electronic Aquavalue comes with a control panel, spanner and comprehensive installation and operation instructions. Fittings are purchased separately to accommodate the large variety of plumbing configurations found in marine sanitation applications.

NEW RETRACTABLE HANDLE CREATES POWERFUL PUMPING

The most dependable name on the water, Raritan, offers a new feature on its PHII and PHC manual toilets setting it apart from the competition. The new retractable handle now enables owners to install the toilet in confined areas more easily.

Much simpler and cleaner than knob pumping, lever handle pumping also results in more powerful flushing action.

Constructed from Celcon-engineered plastic, the retractable handle is tough and will not break. Its low friction makes for easier pumping.

The PHII and PHC offer long-term reliability with ¼ turn dry pump valves and O-ring seals. An air vent reduces back pressure for trouble-free pumping in the "dry" position. Utilizing precision ground rubber balls for more reliable performance, the raw water inlet and outlet valves can lift incoming flush water 4'.

With a 66% bigger piston than competitors, users can clear the bowl quicker. The double-action piston pump simultaneously draws new flush water as it discharges the wastewater.

Both toilets offer a simple design for economical, trouble-free and quiet operation. Easy to rebuild, they're designed for years of service. Standard and household-size bowls are available for both models.

RARITAN NOW OFFERS THE SANI-FLEX HOSE

Boat owners looking for a one-stop-shop for all their sanitation needs can set their sights on Raritan. The company now offers the highest quality marine sanitation hose, SANI/FLEX.

Constructed from Butyl rubber, it has the lowest odor permeation level, not found in other rubber or PVC material hoses. Extremely flexible for easy installation, it supplies a low-bend radius up to one time its diameter.

Designed as a sewage pipe for marine toilets, its main advantage is to avoid the spreading of odors from the head's discharge. The SANI/FLEX hose is white, odor-free and constructed from anti-bacterial, vanilla-scented rubber that's abrasion, ozone and seawater resistant. Smooth covered and without any ridges, this hose easily slides over fittings.

It's reinforced with a double-steel wire helix and high-strength synthetic textile yarn. SANI/FLEX works with temperatures between -40°F to 248°F. It comes with a five-year warranty.

Raritan produces superior marine toilets, waste treatment systems, water heaters and icemakers. The company is headquartered in Millville, New Jersey, USA, with an office in Ft. Lauderdale, Florida.
